

ACTIVITY ORGANISERS AND PARTNERS

HONG KONG MARITIME WEEK 2021

The Hong Kong Maritime and Port Board, together with its co-organisers the Hong Kong Shipowners Association and the Hong Kong Maritime Museum, and its partners Hong Kong Trade Development Council and Invest Hong Kong, will organise the fifth Hong Kong Maritime Week from 31 October to 6 November 2021 to “Propel Hong Kong” as a renowned international maritime centre. Through intensive and multifarious maritime activities, we hope to raise public awareness of the economic contribution made by the port and maritime sectors, enhance young people’s understanding of the maritime industry to attract them to pursue a career in the industry, and to promote Hong Kong as a preferred base for operating maritime businesses. International and local industry luminaries and practitioners will come together to participate in a myriad of diversified and fun-filled physical, online and/or hybrid activities including conferences, forums and seminars, ceremonies, visits, competitions and game booths, etc. We look forward to seeing you in the Hong Kong Maritime Week 2021!

The Hong Kong Maritime Week 2021 consists of over 30 activities to be staged by more than 40 local and overseas industry organisations and professional associations to showcase Hong Kong’s strengths as an international maritime centre and the quality maritime services provided by our vibrant maritime cluster.

Hong Kong Maritime Week covers 9 themes:

EDUCATION AND CAREER

With the aim of developing a vibrant, diversified and competitive pool of professionals and technical personnel, the Maritime and Aviation Training Fund (MATF) was set up in 2014 to help grooming talents for the maritime industry. The Fund supports various training schemes and scholarships programmes, launches new initiatives and supports promotion ventures. The MATF has so far benefitted more than 7 200 students and maritime practitioners.

GREEN SHIPPING & DECARBONISATION

To protect the marine environment and enhance Hong Kong's position as a world-class port, relevant environment impacts and sustainability assessment requirements are complied in the course of port planning and development in Hong Kong. To further strengthen the port cluster's global competitiveness, China's Ministry of Transport signed an agreement with the maritime authorities of Hong Kong and Macao to establish a collaborative mechanism to promote green shipping development in the Greater Bay Area.

MARINE INSURANCE

Advanced, comprehensive and world-renowned business insurance facilities are being operated in Hong Kong by experienced professionals to serve different shipping operations. They generally cover hull and machinery, protection and indemnity and goods in transit (cargo). The Insurance (Amendment) Bill 2020 was passed in July 2020 to, among other things, provide 50% profit tax concession for eligible insurance business, including marine insurance. The tax concession has taken effect since 19 March 2021.

MARITIME LAW AND ARBITRATION

Hong Kong is a renowned centre of shipping and commercial contract formation as well as dispute resolution. With the established common law system, Hong Kong inherits the jurisprudence of adjudications relating to shipping and maritime contracts, providing legal and commercial certainty for maritime enterprises around the world. The International Chamber of Shipping established its first-ever overseas office in Hong Kong in 2019. The Baltic and International Maritime Council ("BIMCO") announced in September 2020 its adoption of the BIMCO Law & Arbitration Clause 2020, which includes Hong Kong as the fourth named arbitration venue, alongside London, New York and Singapore.

MARITIME TECHNOLOGY & DIGITALISATION

Technology and digitalisation are transforming the world and the way business is done. It gives the international maritime industry a new impetus to scale new heights. Technological terms such as artificial intelligence, blockchain, virtual reality, internet of things, are familiar to the general public. Hong Kong is well-positioned for innovation and adoption of new technologies to further the development of our maritime industry and high value-added services, including developing a Smart Port.
